

Empower Your Patients With Healthy Sleep

A modern sleep medicine clinic, obsessed with health outcomes

Sleep disorders are silently killing your patients.

Over **70 million Americans** suffer from **insomnia and sleep apnea**. Untreated sleep disorders are directly linked to heart disease, diabetes, depression, Alzheimer's, and other chronic diseases. 80% of sleep apnea is undiagnosed.

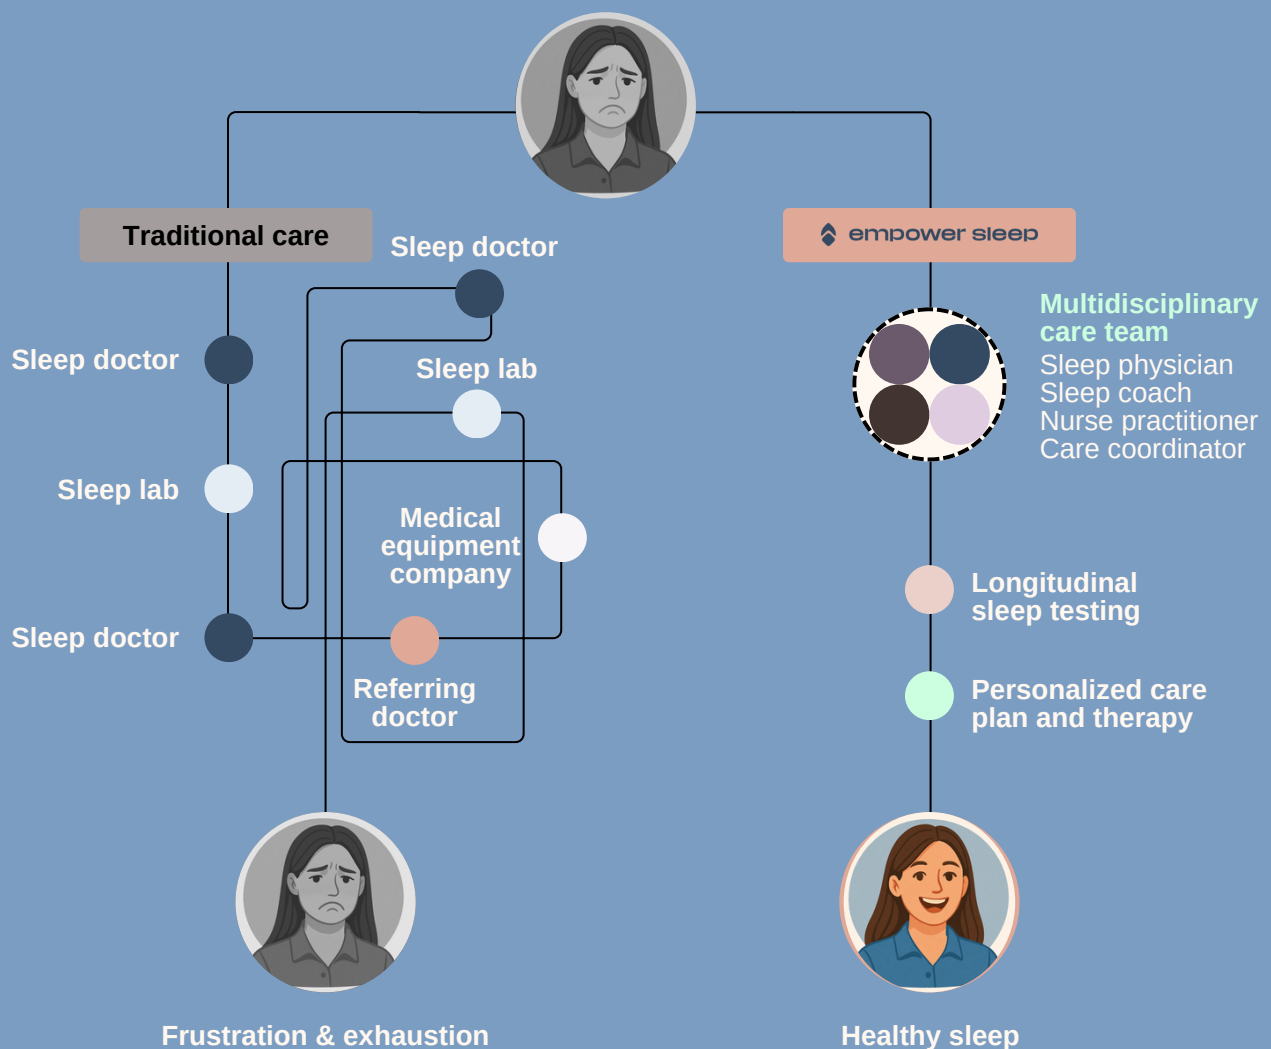

Over **30% of your patients** likely suffer from a **sleep disorder**. You're already seeing the symptoms—fatigue, burnout, brain fog, and poor metabolic health and blood pressure control.

You play an important role in identifying poor sleep health in your patient population.

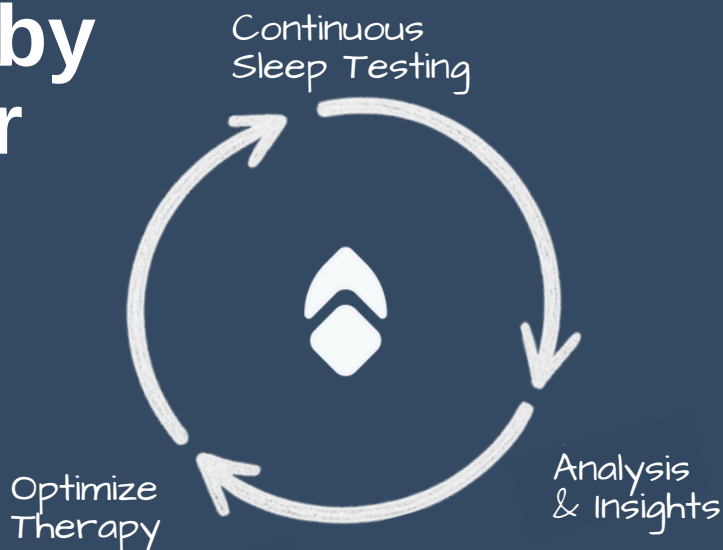

What is Empower Sleep?

Empower Sleep is a **data-driven virtual sleep clinic that diagnoses, treats, and manages sleep disorders** with medical-grade diagnostics. Our board-certified sleep physicians use longitudinal sleep testing, AI-powered data analysis, and comprehensive treatments to deliver personalized care—all from the comfort of the patient's home.

We were inspired by what CGMs did for diabetes care.

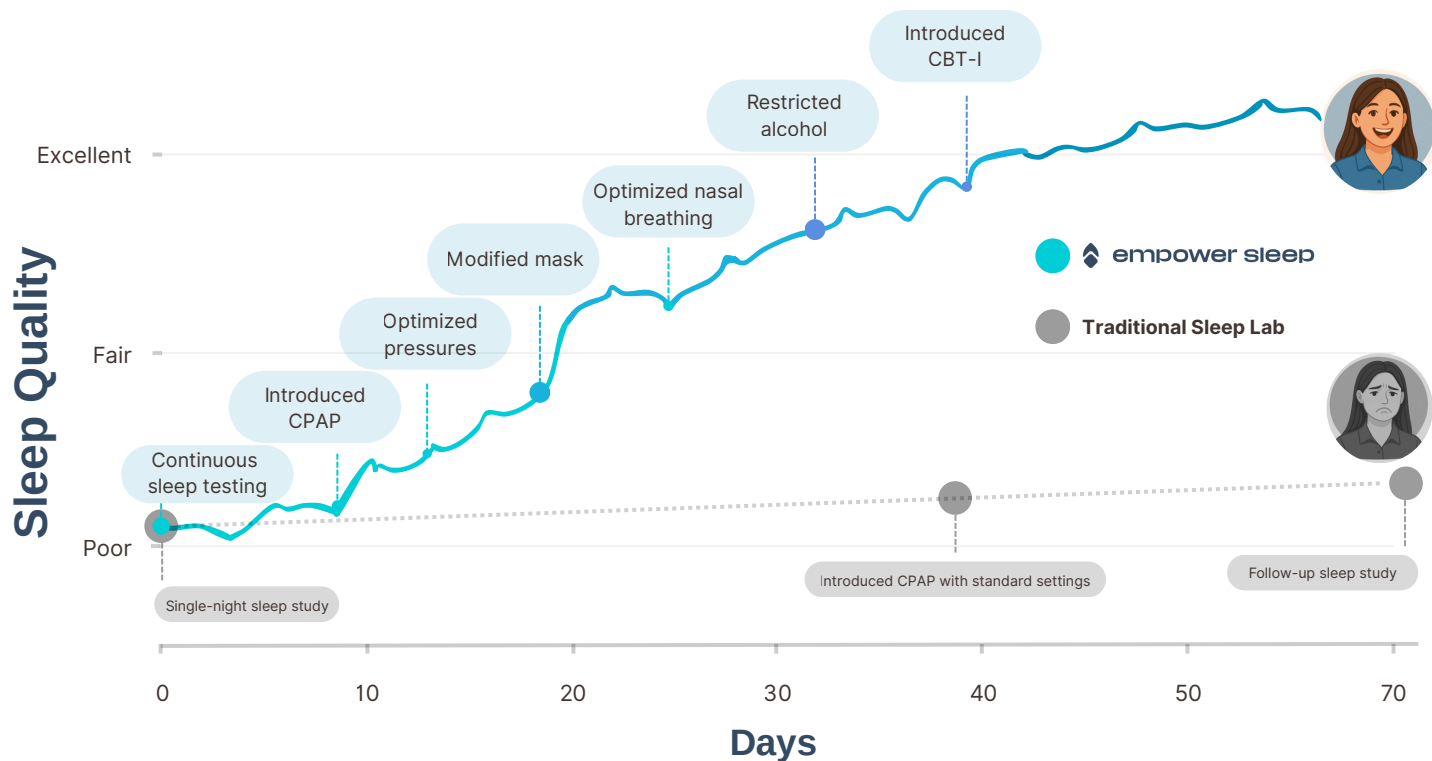

So we did the same for sleep care.

Single-Night Sleep Testing (Snapshot)

The results?

Thousands of humans with healthier & happier lives

“

"I was referred by my concierge doctor. Empower Sleep's level of care exceeded even my highest expectations. It's like having a sleep team on call."

— **Sarah V., 47, Concierge Medicine Patient**

“

"I would snore for years and feel exhausted. Turns out I had severe sleep apnea. Within weeks of starting Empower Sleep, I had more energy, better focus, and finally stopped relying on coffee to survive the day. They dialed in my CPAP using tons of data. This is the future of healthcare."

— **Jason L., 42, Tech Executive**

“

"Between work and kids, I thought exhaustion was just normal. Empower Sleep uncovered my insomnia and helped me get back on track with a plan tailored to my life. I finally feel like myself again."

— **Cynthia K., 36, Mom of Two**

Meet our dedicated care team

Real experts. Real sleep science.

Empower Sleep is led by a multidisciplinary team of board-certified sleep physicians, sleep coaches, and care coordinators who are obsessed with outcomes. We combine clinical expertise with cutting-edge technology to deliver deeply personalized, evidence-based care. Whether it's sleep apnea, insomnia, restless legs, or circadian rhythm disorders, your patient is supported by experts who live and breathe sleep medicine.

HEALTH

After you refer the patient, we manage their end-to-end sleep care within days.

STEP 1

You refer the patient digitally or via fax

An Empower Sleep care concierge will reach out to the patient within 24 hours to help them get started. We will tell them more about the program, pricing, process, and answer any questions the patient has about the program.

STEP 2 (Optional)

Patient completes a telehealth Sleep Health Assessment

Patients can choose to begin with a 60-minute Sleep Health Assessment led by a board-certified Sleep Physician and Sleep Coach. During this visit, we review their sleep goals, medical history, medications, and risk factors for fatigue and poor sleep. This step is optional—patients may proceed directly to sleep testing if preferred.

STEP 3

Patient begins longitudinal sleep testing at home

We ship the patient a FDA-approved home sleep test and they complete 7-10 nights of testing. All data is visible in the Empower Sleep app, along with preliminary insights, feedback, and messaging access to their doctor. They'll also receive unique insights and educational content tailored to their results.

STEP 4

We analyze the results and create a personalized care plan

Once we have preliminary sleep data, the patient meets virtually with their care team to review the data and co-design a personalized treatment plan—based on science, lifestyle, and what truly works for them.

STEP 5

Patient starts therapy and we optimize their sleep using data

Patients engage in physician-guided treatment trials including CBT-I, positional therapy, CPAP, oral appliances, supplements, and more. **Everything is shipped directly to the patient's home.** Ongoing sleep testing, remote monitoring, and regular telemedicine check-ins help us refine the plan using real-time data from the sleep test.

STEP 6

Patient returns the device once their sleep is optimized

Once the patient's sleep is improved and stable, they return the sleep testing device to Empower Sleep using the prepaid label and packaging we provide.

Every patient is unique. Each plan is personalized.

Comprehensive home sleep tests
shipped to the patient (longitudinal
and FDA-approved)

Expert coaching with diagnosis
and treatment plans

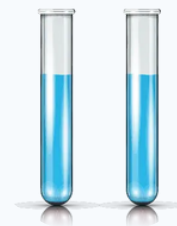

Holistic treatment, including CPAP, oral
appliances, cognitive behavioral therapy for
insomnia (CBT-I), and more

In-app messaging, insights,
and education, 24/7

Dedicated care
coordination

Advanced testing, including full blood
panels, melatonin profiling, and more

Built by doctors. For doctors.

Care that keeps you in the loop

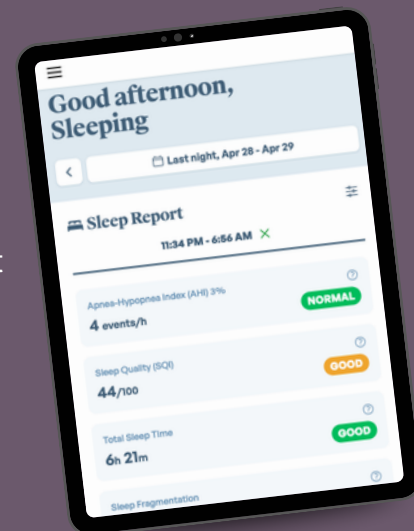

We designed Empower Sleep to work seamlessly with your practice. Our dedicated **Partner Portal** gives you real-time visibility into your patients' sleep care—without creating work for your staff.

What you get:

- **Live patient status tracking** – stay in the loop from referral to treatment
- **Refer in seconds** with our secure form or EHR integration
- **Access clinical notes** and longitudinal sleep test results
- **Curbside consults** with our team to collaborate on care

No referrals left in the dark. No follow-up calls. No admin hassle.

*You stay informed.
Your patient gets better care.
Everyone sleeps better.*

Trusted by the world's top longevity, functional medicine, and concierge clinics.

I have been using Empower Sleep for nearly every patient, especially those suffering from poor sleep, fatigue, brain fog, weight gain, or mood disturbances. I consider it a vital sign, as important as blood pressure or heart rate. I couldn't recommend it more highly

— Dr. Jordan Shlain, MD
Co-Founder, Private Medical

"Empower Sleep has been wonderful to work with. Their referral process is easy and I know my patients will be in good hands with their team. Plus they offer innovative, longitudinal sleep testing which is a game changer for patients struggling with sleep issues."
